InterMetro®

We Put Space to Work™

How InterMetro's product portfolio can help any facility make the most of their production, logistics, and storage spaces.

METRO®

Space Optimization

InterMetro®

Our Solutions for Your Spaces

Providing You With the Tools You Need

Since 1929 Metro has been at the forefront of high-quality storage solutions, which now includes over 30,000 products with a strong focus on **storage space optimization**, **productivity maximization**, and **ease-of-integration** for the pharmaceutical sector.

More Space

More Production

More Turnover

You're on the Right Track with Top-Track™

Metro Top-Track & qwikTRAK

Metro's Top-Track and qwikTRAK shelving solutions can optimize almost any facility's storage management. These systems can **expand storage capacity by over 50%**, offering **weight capacities of 400-900 kg per mobile unit**, and **freeing up more space for more production and storage activities**.

01

Maximize Efficiency and Reliability in Storage

Top-Track ensures reliable systems through its durable design and efficient space utilization.

02

Provide Flexible, Modular Storage Systems

This offers turnkey storage solutions with modular configurations for immediate implementation.

03

Optimize Long-Term Storage Costs and Space Utilization

The system improves cost efficiency over time by maximizing storage capacity and minimizing need for expansion.

Traditional Storage Space

Conventional Shelving Layout

In this current storage system, a traditional arrangement consisting of multiple shelving units is used. The details of this arrangement are as follows:

Number of Shelving Units:

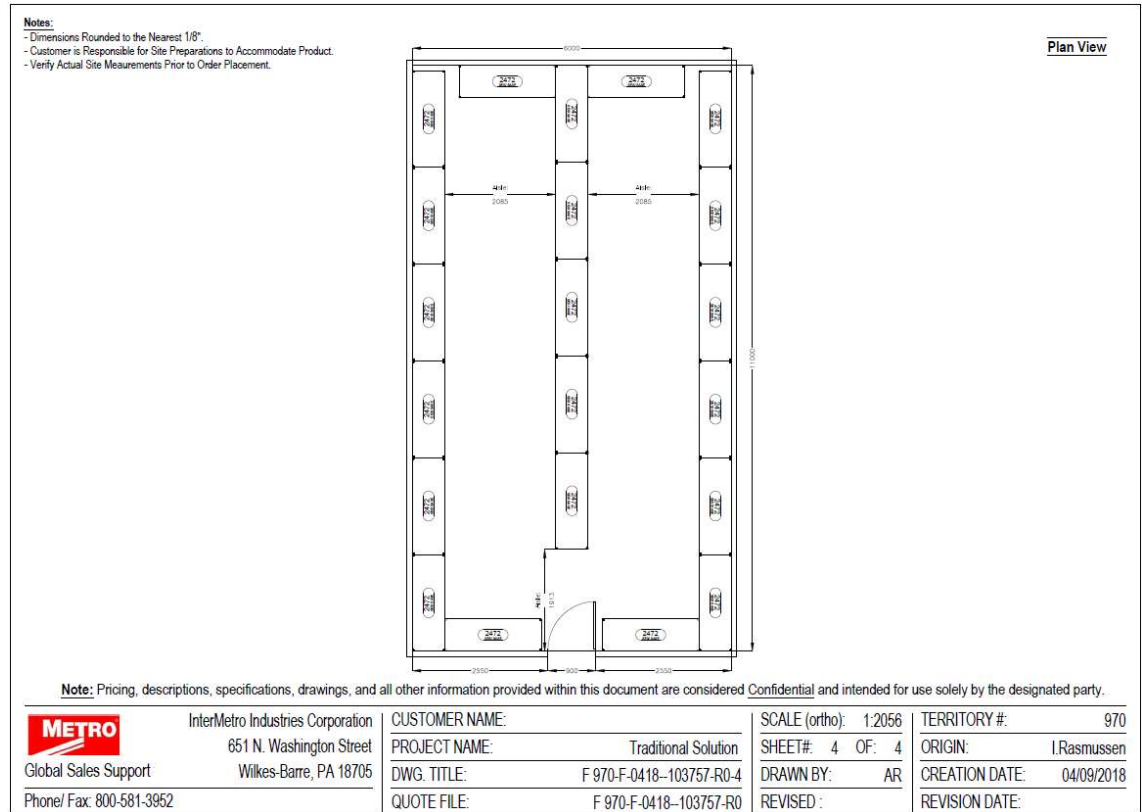

- 21 pcs of shelving units

Shelves per Unit:

- 4 shelves (530x1524mm each)

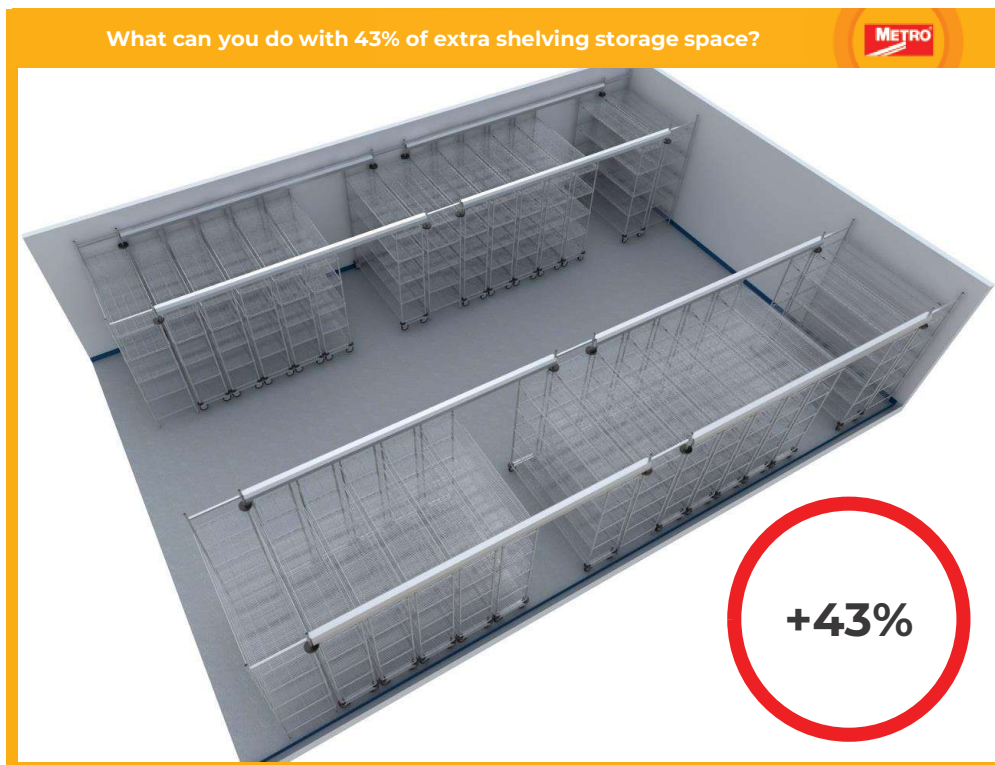

Total Storage Shelving Capacity:

- 67.8 m²

Case Study #1

Top-Track's Easy Storage Benefits

Optimized Shelving Layout

We can optimize your facilities by creating more space within existing sites, allowing for increased production capacity through **implementing Top-Track systems**. Additionally, we offer the potential to maximize production from the beginning efficiency in new facilities.

Number of Shelving Units:

- 30 pcs of shelving units

Shelves per Unit:

- 4 shelves (530x1524mm) /units

Total storage shelving capacity in m2:

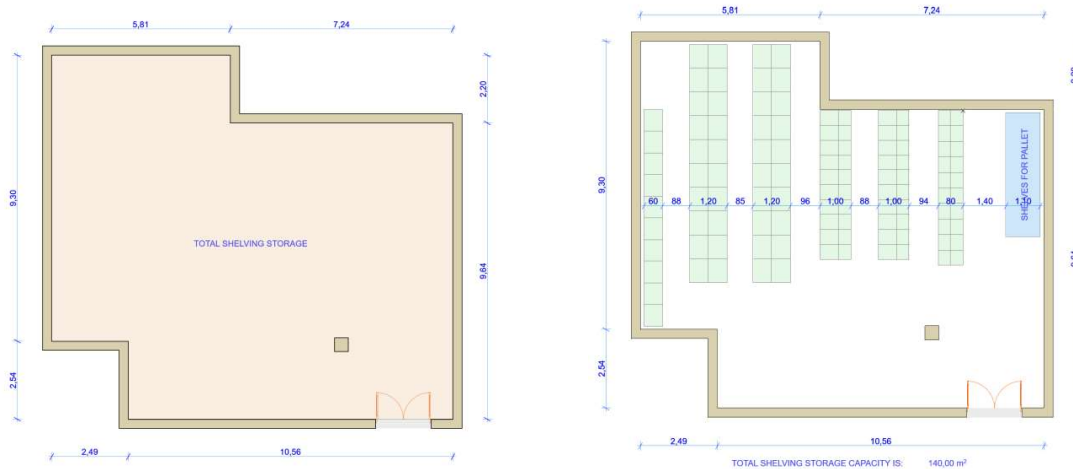

- 97 m2

Case Study #2

Effective Shelving Solutions

Metro's Traditional Shelving Units

This layout shows a 150m² *storage area* with a traditional shelving setup, consisting of **fixed individual wire shelving units**. This solution provides 140m² of *shelving storage space*.

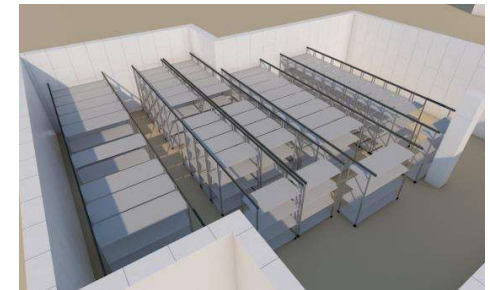

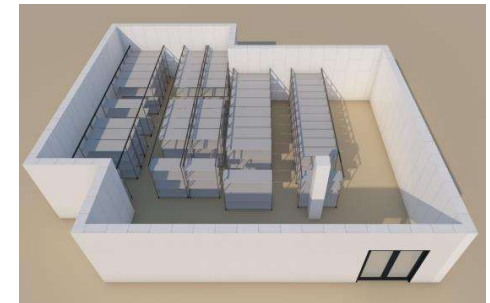

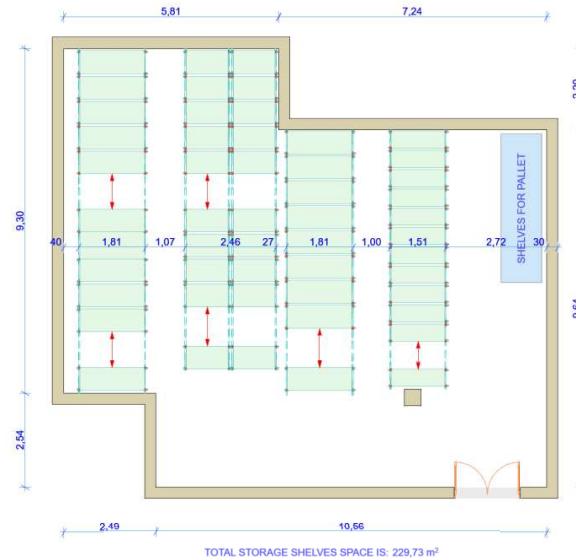

**Original Layout With Traditional Shelves
(Total Shelving Storage Space Is 140 M2)**

Optimal Shelving Solutions

Space Saving Storage Solutions

By implementing top track shelving in this space, we increased the total storage shelving area from 140m² to 229.73m², **achieving a notable 64% increase in storage capacity** within the same 150m² storage area.

Original Layout With Traditional Shelves (Total Shelving Storage Space Is 229.73 M2)

Case Study #2

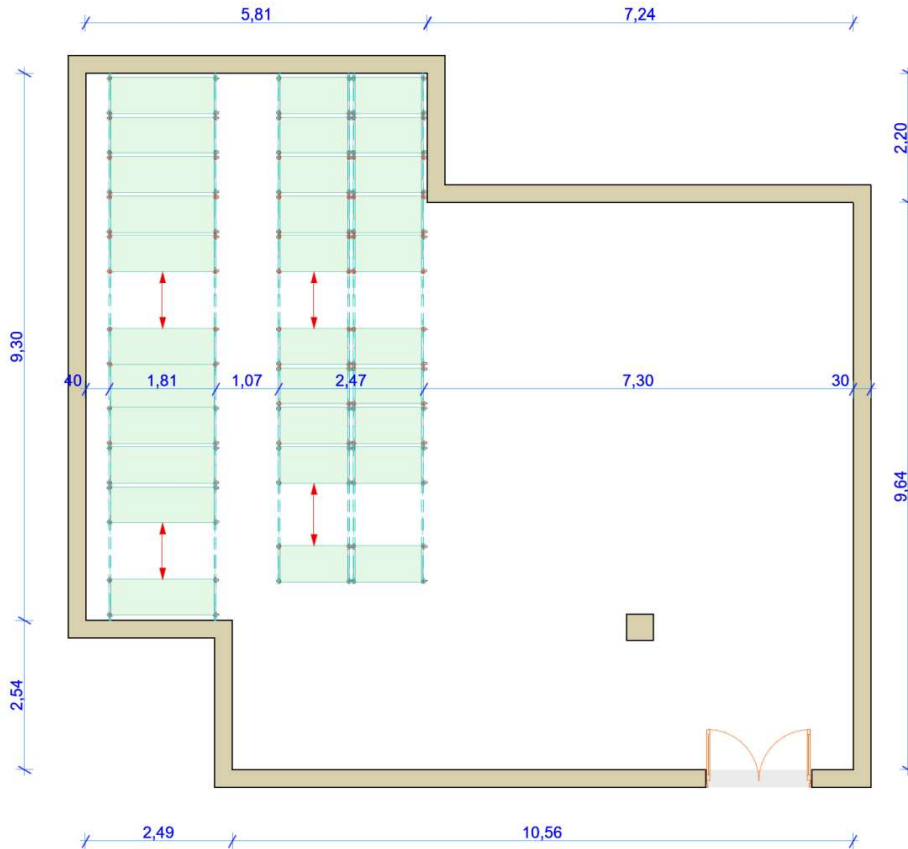

More Space for More Production

Reconverting Storage Spaces

We provide you with more space to produce additional products, specifically 70m² on the right side of the storage area.

Clearing out this section allows for the **creation of a new production room, cleanroom, or laboratory**, enabling you to **increase your production capacity**.

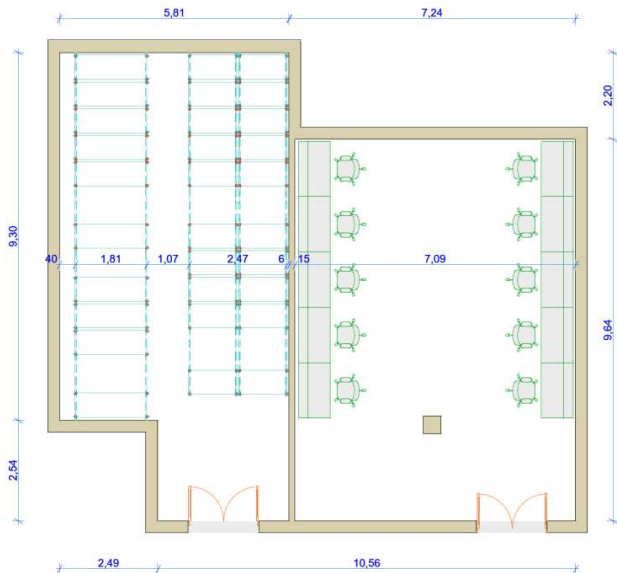

All your current storage items can still be efficiently kept on the left side of the storage room.

Case Study #2

Your Path to Realizing More Profits

Creating New Production Rooms

(1) We gave **64% greater storage shelving space** compared to the traditional setup.

(2) We created **70m² of new FREE space** for a greater amount of production.

(3) We reduced the storage area to **42m²** without decreasing the storage capacity.

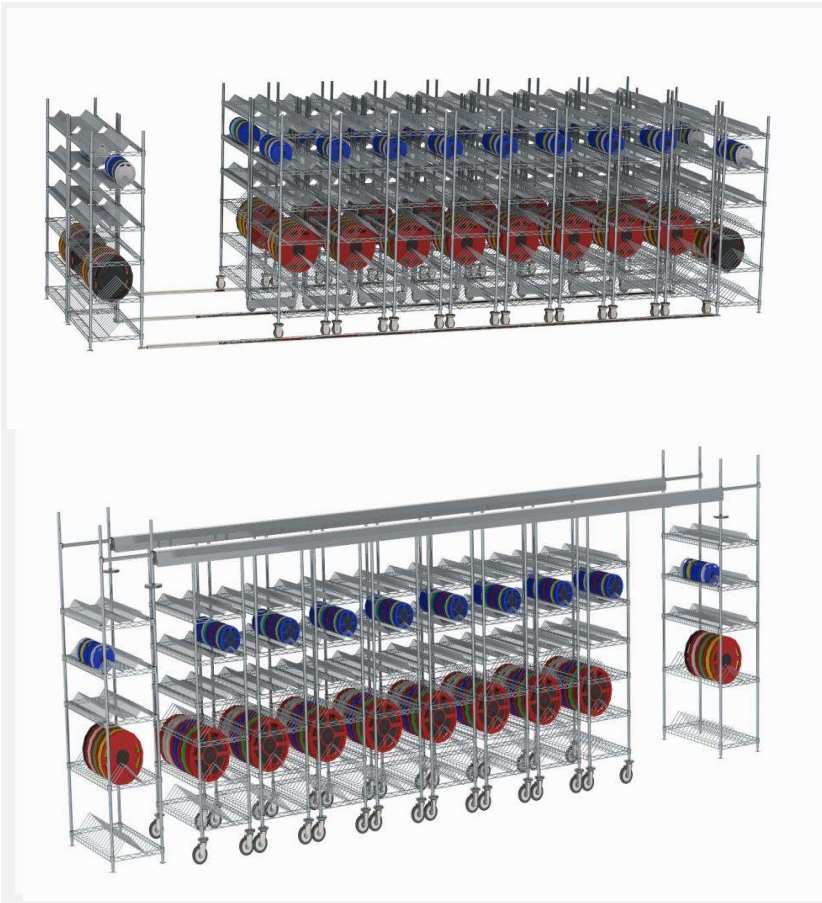

SMT Reel storage solution

Customizable to Your Needs

Tailored Space Optimization Plans

The same space optimization plan can be applied to SMT reel storage or the electronics industry using ESD-safe storage systems.

Economic analyses can be conducted based on your specific measurements and production type, under the discretion of an NDA, if required.
